

Raises total alkalinity in water.

Eliminates corrosive water conditions.

**Maximises efficiency of chlorine,
chlorinators, algecides and**

Aqua Magic.

Safe to use in all types of pools.

Non toxic.

ALKALINITY BALANCE

Directions:

Pour contents directly into swimming pool. Re check total alkalinity reading after one hour. 2kg will raise the total alkalinity in a 30 000 litre pool by 60ppm.

Note: When adding acid it will reduce the total alkalinity, so you need to add double the required amount of Alkalinity balance then when adjusting pH it will reduce total alkalinity down into limits. Ideal Total alkalinity reading is between 80ppm and 120ppm.
